

Globachem is an international, family-owned agrochemical company located in Belgium. We are specialized in developing, registering, and marketing high quality chemical and biological crop protection products for agriculture and horticulture. This means that we are contributing to the world's future food supply ensuring the production of sufficient safe food for the world's growing population.

Globachem Discovery is the UK based division of the Research & Development department of Globachem, and operates in the early phases of the R&D pipeline, creating new molecules and lead chemical series. After initial biological efficacy testing and early toxicology assessment, the molecules move to the Belgian R&D division for further development into highly effective and economic crop solutions.

RESEARCH SCIENTIST

We are looking for a motivated and innovative Chemistry Graduates and experience Chemists to join the Globachem Discovery team. The focus of the role is to join a team of high-quality chemists and work on the R&D of novel and exciting agrochemical projects to deliver the next generation of plant protection products.

A CHALLENGING JOB CONTENT

TEAMWORK

- Work effectively within the team and work towards team goals
- Actively contribute to molecule design and lead generation
- Contribute to project team and meetings

INNOVATION

- Devises efficient and versatile routes within own chemical area and contributes to project intellectual property
